"This is an attractive collection. . . Warner is a classical scholar and has published translations of Aeschylus, Euripides and Xenophon. The scholarship is present in Men and Gods but it is not obtrusive. The emphasis here is on story-telling for the sake of the story." G. D. McDonald

"As a translator Mr. Warner is accurate, bold, and honest. But the reader familiar with the original may well complain that in place of the silken smoothness of the Ovidian hexameter he is offered a sequence of jerky, staccato sentences. . . These and similar signs of hasty composition, which a more thorough version would have eliminated, prevent a good and interesting book from being a much better one." H. H. H.

"A poet and a novelist himself, Mr. Warner obviously enjoyed writing 'Men and Gods.' The translation is free, and the prevailing mood is unsentimental, emphasizing the amoral nature of most of the men (and women) and almost all the gods (and goddesses). The style, limpid and unhurrying, flows through a familiar landscape down to an ageless sea." Roger Pippett

WEIDMAN, JEROME. Hand of the hunter. 311p $3.50 Harcourt

51-9916

"Mr. Weidman takes a successful, respectable, level-headed certified public accountant named Sloate, who commutes from a pleasant home in Rye to his smoothly run office on Madison Avenue, and plunks him down in wartime Halifax Harbor on a rusty wreck of a tub which is part of a convoy waiting to be slipped across the submarine-infested Atlantic. Sloate has a mission, not a very important one to be sure, but one which makes him feel he's doing his bit for the war effort. . . For eleven mystifying days the shoddy ship rides at anchor in the ice-choked basin while Sloate, the crew and the handful of other widely unrelated passengers are tossed about until the rubbing of their elbows and their interests produces a stage where their conjunction results in explosion. WEIL, SIMONE. Waiting for God; tr. by Emma Craufurd; with an introd. by Leslie A. Fiedler. 227p $3.50 Putnam

248 God 51-7174

A collection of the writings of Simone Weil, who was born of Jewish parentage in France in 1909, and died in exile in 1943. During her life she was thought of as a radical; after her death it was discovered that she had had religious experiences of a mystical nature which were taking her toward her union with the Catholic church.

"Her deep love and respect for the Church, even recognition of Catholicism as the truest of churches, will impress those who already share this respect but fear to get involved with what the Germans call *Vulgaer-Katholizismus*. WELLS, HARRY KOHLSAAT. Process and unreality; a criticism of method in Whitehead's philosophy. 211p $3 King's Crown press
191.9 Cosmology. Science—Philosophy. Whitehead, Alfred North 50-8739

"Beginning with Whitehead's attack on bifurcation (dualism), this critique charges Whitehead with failure in it because he himself created an unresolved dualism between process (passage, events), and object (eternal, self-identical). In short, he asserted both the flux of Heraclitus and the one of Parmenides, and never reconciled them. This central defect, Mr. Wells thinks, comes from Whitehead's allegiance to the traditional Aristotelian logic of identity, which underlies his work in Principia Mathematica, 1910-13." "Mr. Wells' discussions are based largely on Whitehead's work of 1919, An Inquiry Concerning the Principles of Natural Knowledge. The Process and Reality, 1929, is used only briefly; Adventures of Ideas, 1933, Whitehead's own favorite among his books, is almost ignored. The problem of possible development in Whitehead's thinking is overlooked. Concepts like creativity and actual occasions are insufficiently analyzed; societies of occasions and personal identity are not touched on. But these omissions and inadequacies, together with some formal errors, should not lead the reader to underestimate a keen and original treatment."

Off to an awkward start, and somewhat bogged down by the drawn-out cafe discussions of liberals during the late '30's, this follows Georg from a brief Italian holiday, to a setback in his career and the opening of a book publishing firm, and gradually but inevitably to war. From 1943 and the first effective airraids against Berlin, the story picks up pace and becomes sharply vivid in its descriptions of life in the city when Berlin is reduced to rubble." Kirkus

This time the concentration is on romance. . . In 1945 the three meet again. The brothers have returned as heroes from the war; the girl has been battered, shamed and frustrated by a desperate promiscuity. At their reunion, somewhat uncertainly, she chooses solid Philip." "It does a thorough job; but, except for some new examples of systems, it might well have been written thirty years ago, and even in the presentation the reviewer finds little of novelty to spice what always has been an insipid diet to all but a few enthusiasts. . . This book is intended for undergraduate teaching; there is little doubt that it presents clearly the facts about a large number of systems, but we wonder whether such compilations of facts do not belong more properly in the handbook for the specialist, and whether the discipline of mind and broadening of understanding given by thermodynamics and statistical mechanics suitably blended with the facts of chemistry are not more fitting ingredients of the education of the mid-twentieth century undergraduate." This is a useful book, but it is incomplete. Furthermore, it is somewhat confusing as to its purpose. One gets the impression that the author in times past, when his energies were less fully utilized by pressing day-to-day tasks, accumulated a considerable mass of material which he now finds himself unable, because of current demands upon his time, to bring up to date." WIGHTMAN, WILLIAM PERSEHOUSE DELISLE. Growth of scientific ideas. 495p il $5 Yale univ. press
509 Science—History

"W. P. D. Wightman describes the evolution of the most important ideas of physical and biological science. The book has two parts: Matter and Motion; Nature and Life. . . One gains an excellent understanding of the growth of ideas in physical science up to about 1900; the twentieth century is dealt with only in an introductory way. In part two Wightman includes chapters on What is Life?, Organisms as Machines, The Darwinian Revolution, and Continuity and Organization." Sat R of Lit

---

"History with an abundance of factual material coherently organized and intelligently interpreted." W. E. G.
+ **Christian Century** 68:896 Ag 1 '51 160w

"Dr. Wightman has chosen to present the history of science as the story of the growth of ideas. . . He has tried throughout to place himself at the view-points of the workers whom he is discussing, and he has therefore had to give serious attention to beliefs which we call superstitions but which were once rightly regarded as valid possibilities. This is a remarkably difficult thing to do, and he has succeeded admirably, though better in the physical than in the biological section of the book. Such an achievement is possible only through wide and careful reading of original sources, and there is unmistakable evidence that Dr. Wightman has undertaken this." Herbert Dingle
+ **Manchester Guardian** p4 My 26 '50 280w

"The main purpose of this book is to reveal science 'as a struggle . . . no less charged with humanistic values than the struggle for political liberty and national expression.' That purpose is admirably achieved. In concentrating on the conflict between old and new ideas, William Wightman, former head of the Science Department at the University of Aberdeen, shows that the history of science can be as interesting to the general reader as it is to scholars. He has also produced a meaningful psychological study of resistance to change in any field." John Pfeiffer
+ **N Y Times** p10 Ag 5 '51 280w

"The book is written in spirited style and is enlivened with some biographical details. It is easily understandable to anyone who has taken some undergraduate courses in science and will be enjoyed by everyone who wishes to learn about the part played by science in the creation of culture." "Among works of its kind Dr. Wightman's book is likely to prove outstanding. He holds his reader's attention at every step; the clarity of his style, his zest for the humaneness of the story he unfolds, his skill in transporting his reader into the older ways of thought—all these have counted in his success."

658.1 Directors of corporations 51-10119

"[This book covers] the history of the development of cumulative voting as a device to assure representation of minority groups of stockholders (now mandatory in 21 states, permissive in 17); how it operates and how it has worked in practice in various types of companies; its advantages, and how its disadvantages can be minimized. The author's view is that management should make this concession of power to stockholders as a matter of fairness, and to forestall the probable alternative of more drastic action by government." Library J

"Not only has the author covered the reported cases and the statutes comprehensively, but, far more important, he and his staff have journeyed into the field and dug up in detail the facts of many battles for control in which cumulative voting has been a significant element. These otherwise unreported lessons are related succinctly but in a highly readable narrative style. This reviewer's only regret is that the identity of the companies and of the many colorful characters who tilted for their hands has been disguised." Robert Amory

WILSON, DONALD POWELL. My six convicts; a psychologist's three years in Fort Leavenworth. 369p $3.50 Rinehart
365 U.S. Penitentiary, Leavenworth, Kansas. Crime and criminals. 51-9110

The author, a professor of psychology, spent three years at Fort Leavenworth some years ago, under a Public Health service project, studying the relations of drug addiction to criminality. His account of those years is told largely as the stories of his six convict assistants: a second-story man; a Chicago gangster; a murderer; a counterfeiter; the boy who took the rap for a girl; and an engineer turned forger.

"This meaty, insightful book is being widely read for entertainment, thanks to the Book-of-the-Month Club, as well as popular enlightenment on modern criminology and penology. "The selections in this anthology show that Edmund Wilson has maintained the freshness and sincerity of his ideals. . . But that ideological center which in Wilson was to crystallize in a wary liberalism, always honest if not always perceptive, though imparting a form to its negations, never quite understands all the deviations from its own taste. The religious experience, in particular, is not Wilson's forte. . . But these flaws are only additional signs that Mr. Wilson is of an earlier generation, not too sympathetic to contemporary literature. He does not approve greatly of these times. As this collection shows, however, he has made an excellent attempt to understand them and even where he falls, he falls with quite a substantial thud. Few critics have that much substance." It is, nonetheless, in the further elucidation of his position with regard to its practical bearings that difficulties arise. The paradoxical character of these difficulties consists in the circumstance that, while Wilson is emphatic in pointing out the unrealistic utopianism of some varieties of 'historical liberalism, his own procedure, by concentrating on 'principles' as opposed to 'secondary programs' or 'irrelevant forms', converts conservatism itself into an equally utopian position which is hardly assimilable to many of the existing facts." "There is no doubt that the book will be extremely useful to anyone engaged in cloud-chamber work. The great improvement made by Cowan in the operation of the diffusion type chamber first described by Langsdorf is causing a mild revolution in cloud-chamber work because of the great increase in the rapidity with which data can be obtained, and the infinite sensitive time; and although this improvement is not mentioned, it is excellent to have this good summary because it is a great assistance in appraising the value of the diffusion chamber." 226.2 Bible. N.T.—Single books—St Matthew. Sermon on the Mount

"The first edition of the late Professor Windisch's The Meaning of the Sermon on the Mount appeared in 1929. . . The great importance of this book lies in its restatement of the traditional view of the Sermon on the Mount as over against some of the bizarre 'theological' theories that have emerged since the opening decade of this century." (Crozer Q) Index.

"Professor Gilmour's brilliant and accurate translation is as readable as the German original. Unlike some modern translators of foreign theological works, Professor Gilmour is completely competent—he could have written a book of this quality himself, and he doesn't have to guess at the meaning of words and phrases. They are part of his everyday speech!. . One of the great landmarks on the way toward a sane and defensible interpretation of Jesus's ethic is the book before us. It is a book that deserves to be read and reread, and taken to heart by our generation." F. C. Grant

Then, too, by focusing our attention on a book written in 1928 (the revised edition appeared in 1937, two years after the author's death), this translation gives a basis of comparison for the methods and results of biblical study over the last quarter-century." "If the English had best-seller lists in 1854, probably 'Fabiola' topped the fiction section. That was the year Nicholas Cardinal Wiseman published his enormously popular historical romance about early Christian martyrs, Roman catacombs, and the salvation of a beautiful pagan miss named Fabiola. Yet like many another religious best-seller which owed its popularity not so much to literary as moral excellence, Cardinal Wiseman's only novel has been firmly forgotten. Eddie Doherty, well-known Catholic newspaper man thinks this is a shame and has accordingly, rewritten 'Fabiola' for twentieth-century readers." N Y Times

973.7 U.S.—History—Civil war 51-13640

"The author, who died last year, called this book a 'reappraisal of the Civil War.' His basic premise is that the American people went loco on a national scale in the decade preceding Fort Sumter and then fought a war for which both sides were totally unprepared and for which there was no necessity. The conflict itself, as Mr. Woodward presents it, was a dismal pageant of political blundering and military boneheadedness, during which there were any number of opportunities to put a stop to the carnage, had anyone had the will or the intelligence to seize them." WOODY, THOMAS. Liberal education for free men. 296p $4 Univ. of Pa. press
370.1 Education, Humanistic 51-1917

"For the most part, this book is an historical study of changing concepts of values and curricula in liberal education. One chapter illustrates the Chinese emphasis on the six virtues, six good actions, and six arts; another is devoted to the Athenian principle of the mean, with its interdependence of intellectual and physical exercise. A discussion of Roman liberal education is followed by pictures of liberal education *in extremis* in Europe's Age of Faith and resurgent in its Renaissance. Liberal education in America and in Europe during the eighteenth and nineteenth centuries, the author indicates, was like the disciplines in earlier cultures, designed for the free, the socially and politically competent elements of society, in short, an elite." The same subjects have, in fact, been used under political regimes that were far from democratic to produce men who never understood the meaning of freedom. It would have enhanced the value of the book if Dr. Woody had discussed the methods by which a liberal education for free men can be attained, and if, instead of leaving to the last paragraph of the book the clear and concise statement of the ends of such an education, he had woven them into the pattern of the curriculum proposed." 301.8 Social problems [51-1818]

"Mrs. Wootton, who is Professor of Social Studies in the University of London, describes her book as 'an essay in the application of scientific methods to human problems.' . . The early chapters give a clear exposition of the fundamental theoretical problems of scientific method, without ever losing sight of the social background and responsibility of science. The author displays a rare gift of seizing upon what in other studies is relevant to her own. Every page testifies to wide and critical reading in subjects too often neglected by social scientists, for example, in general philosophy, theology and aesthetic theory." Hibbert J

"In the first half of her book the author is shrewd and stimulating. She makes trenchant criticisms of the biological analogy and of the transformation of Marx's hypotheses into the system called Marxism. . . The second part of her book is a different matter. . . Miss Wootton strikes me as naive and uninformed. She seems to regard philosophers as perversely hostile to science—as men who would be angry if obstinate fact or scientific truth should puncture a pet theory." J. G. Leyburn

The attractiveness of Mrs Wootton's style should not, however, be allowed to soothe the reader into a failure to recognise that he is here confronted with the central problems both of scientific method and of our civilisation. On some of these problems the author's touch is indeed too light. . . The general argument of her own book presupposes the validity of causal connections in unique, non-recurrent historical situations. Willie's career from midshipman to captain of an ancient minesweeper, the Caine, is traced, as well as his love affair with a pretty night-club singer.

"It has the time sense, the enormous boredom, the sense of being hopelessly isolated and cut off from home, which every veteran remembers; it has the scope and the skill to reveal how men are tested, exposed, and developed under the long routine of war; finally, it has the slow-fused but inevitably accumulating tension of the Mutiny which gives both form and explosive climax to the story." But, in fact, so convincingly has Mr. Wouk created his officers, so subtly has he contrived the series of incidents that culminate in the final drama, that, given both the characters and the situations, the climax is perfectly acceptable. The main incident, as Mr. Wouk says in a note, is fiction in a historical setting; but it is fiction that all along the line throws off real problems and faces them in mature fashion."

"In the judgment of this reviewer, Wrenn has helped student personnel work 'come of age' by pointing out the central importance of counseling and non-classroom experiences. These elements have a long-ignored significance within the matrix we usually refer to as 'total college experience.' Beyond Wrenn's concept, however, lies an even more fruitful one to explore: the study of student personnel work in general and of counseling in particular not merely as concomitants of the formal academic activities but as organic parts of the instructional program itself." She knows the fierce pride and jealousies of country people, and her tale is well-constructed, leading up to a climax which is the more believable because she resists the temptation to make it a conventionally happy one. Her characters perhaps share a common weakness in that they tend to run to types: the prostitute with the heart of gold; the Mother Superior who bicycles briskly through the parish: one has the feeling of having met them elsewhere. He has had the good sense, besides, to let the elder James speak for himself through much of his book, and the elder James could apparently speak for himself very well—with a contagious ebullience and charm and with an unpretentious candor that is unusual when a man is dealing with large themes." "Mr. Young, who teaches at Rutgers University, has sought painstakingly to render his work intelligible. By giving us very full quotations from the miscellaneous writings and lectures he vouchsafes us the fullest picture we have yet had of the mind of this brilliant founder of an American family of intellectuals and shows us the roots from which its philosophy sprang. Yet for those uninitiated either in theology or philosophy the obscurity remains, even though it has been illuminated by a methodical and scholarly commentator." Leon Edel

"Professor Young has equipped his book with such a formidable battery of pre-publication comments that only the hardiest reviewer can fail to be intimidated. . . The academic gentlemen to the contrary, there is yet another book to be written on Henry James, Sr. This one must, however, be constantly at the hand of the man who writes it. What Henry James thought cannot be exhaustively understood without it." C. H. Grattan

YOUNG, STARK. The pavilion; of people and times remembered, of stories and places. 194p $2.50 Scribner

B or 92 Authors—Correspondence, reminiscences, etc. 51-12271

The author and critic relives in retrospect his early years in the deep South in the eighties and nineties, and his later years in New York. The account of his many kinfolk, their gentleness and their vagaries, takes up the major part of the book.

"I found the book disappointing. It is well written, of course; Stark Young couldn't help writing well. But the book is muted to the point of being muffled; the taste and elegance and cultivation are apparent only in wisps; the brilliancy exits before the powerful entrance of anonymity, though one may take away a possible consolation: in some ways this modesty is admirable, being perhaps a triumph of a form of secular grace." Serra, Junipero—Fiction 51-2723

A story of nine crucial days, days in 1769, when the founder of the California missions waited for a ship, a ship that others did not think would come. The story deals not only with Father Serra and the Spaniards who accompanied him but also with the Indians he sought to convert.

In her introductory note Miss Ziegler declares that there are certain moments in men's lives when they become aware of a reason for existence. A better balance from the standpoint of use by industrial engineers would result from more consideration of the users of equipment." A. E. Lawrence

"The idea behind this book is excellent but its execution leaves much to be desired. . . The title is much too broad and all-inclusive; apt to be misleading. A more descriptive and accurate title might be, 'Engineering and Economic Factors Entering into Selection of Chemical Process Equipment.'. . It is gratifying to see some attempts to provide operating cost data. . . This book, unfortunately, is not the answer to the chemical engineer's prayer." C. H. C.

ZIMMERMANN, ERICH WALTER. World resources and industries; a functional appraisal of the availability of agricultural and industrial materials. rev ed 832p il maps $7.50 Harper

338 Natural resources. Industry 51-10071

"This is the second edition of Dr. Zimmermann's comprehensive analysis of the availability of agricultural and industrial materials. . .. The new edition has been almost completely rewritten and incorporates the latest figures and data on the worldwide production of foods, fibres, minerals, chemicals, etc. Dr. Zimmermann does not limit his classification of resources to raw materials. He also considers other factors—labor supply, power, technological skills, distribution systems and access to markets." (Current Hist) For first edition see Book Review Digest 1933

ZOCCA, LOUIS RALPH. Elizabethan narrative poetry. 306p $5 Rutgers univ. press

821.09 English poetry—History and criticism 50-9767

"In this study Professor Zocca examines three important classes of Elizabethan narrative poetry: the historical, the fictional, and the mythological. His method of approach to each class is to sketch in the English and continental backgrounds, to consider in detail the numerous examples of the class, and to survey the sources from which the poets drew their materials. . . In a final summary, the author ventures some general conclusions about Elizabethan narrative poetry." (U S Quarterly Bk R) Bibliography. Index.

"Most of this material, as Mr. Zocca ruefully notes, is of no literary value; but it may be, as he says, useful to the social historian; and it is certainly helpful to anyone concerned with estimating the literary achievement of Shakespeare, Marlowe, Drayton, and, preëminently, Spenser." Subject and Title Index

To Author Entries, March, 1947—February, 1952

Owing to the fact that the Book Review Digest year does not correspond to the calendar year, running instead from March to March, index entries for January and February of each year refer to the volume dated the previous year; i.e., January and February 1948 will be found in the 1947 Annual. These entries are thus indicated in the Index: (Ja '48) (1947 Annual); (F '48) (1947 Annual).

A reference followed by two dates e.g. either (1947, 1948) or (Ag '48) (1947 Annual) indicates a book that has been re-entered, with additional reviews, or as a new edition, after its first entry. For such references consult both volumes.
